## Containers for Change Infrastructure Upgrade: Custom Made Trailer

ABC Foundation Ltd

Completed August 2024

The project involved the purchase of a specialised trailer to transport intermediate bulk containers (IBCs) and wheelie bins to and from sites, venues and events across the Gascoyne. Creating one new job, the trailer will add further value to ABC Foundation's can counting machine, which will be able to operate at increased capacity.

*"This upgrade was essential for reducing transport time and costs, allowing us to expand our services to more events and venues, including adding Gascoyne Junction as a new collection site. Containers for Change also set out to create one new Indigenous job to manage operations at the Gascoyne Junction site, contributing to local employment and community development."*

Karen Stead, ABC Foundation Ltd

**Enhanced** the reach and efficiency of the Containers for Change Scheme across the Gascoyne region.

**One** new indigenous job created

**One** new collection site opened

**40%** increase in containers collected per trip
